Fidelity Monitor

University of Pittsburgh and Indiana University

Supervisor: Robert J. Ferguson, Ph.D.

Received training in administering Memory and Attention Adaptation Training (MAAT) for the treatment of chemotherapy-related cognitive dysfunction among cancer survivors. Monitor fidelity to clinician

treatment manuals of MAAT and supportive therapy for an NCI-funded R01 clinical trial [R01CA244673]. Developed and maintain fidelity recordkeeping systems and procedures.

August 2018 – August 2023

Graduate Research Assistant

Indiana University-Purdue University Indianapolis

Supervisor: Catherine Mosher, Ph.D.

Screen, recruit, and obtain informed consent from cancer patients at Indiana University Health, Community Health, and Eskenazi Health for an NCI-funded R01 clinical trial [R01CA230542]. Coordinate and administer structured interviews and related appointments. Perform chart reviews of enrolled patients and extract relevant cancer information. Develop and maintain recordkeeping systems and procedures. Monitor progress of research activities and prepare periodic and ad-hoc reports, as required. Co-develop training materials related to protocol requirements, data collection, and execution of research. Provide appropriate training and supervision to support staff. Write papers for publication and perform statistical analyses.

January 2017 – May 2018

Undergraduate Research Assistant

University of Dayton

Supervisor: Lee Dixon, Ph.D.

Recruited and obtained informed consent from participants at the University of Dayton. Administered surveys and scheduled time slots. Qualitative and quantitative data management.

September 2015 – May 2016

Research Assistant

University of Dayton Research Institute, Human Factors Group

Supervisor: Ashley Haubert, M.S.

Recruited and obtained informed consent from participants at the University of Dayton and Wright State University. Administered surveys and computer-based cognitive tasks. Coordinated longitudinal data collection and oversaw participants' financial compensation. Created literature database of simultaneous vs. successive vigilance studies. Assisted in data management and statistical data analysis in SPSS. Received basic EEG training.
